Indicators

Not all malicious and suspicious indicators are displayed. Get your own cloud service (https://www.falcon-sandbox.com/) or the full version (https://www.crowdstrike.com/endpoint-security-products/falcon-sandbox-malware-analysis/) to view all details.

Malicious Indicators 6

Anti-Detection/Stealthyness

Calls an API typically used to create a thread in another process

details

"win33.exe" called "CreateRemoteThread" with parameters {"hProcess": "652"
"lpThreadAttributes": "0"
"dwStackSize": "0"
"lpStartAddress": "49494768"
"lpParameter": "0"
"dwCreationFlags": "0"
"lpThreadId": "0"}

source

API Call

relevance

10/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Aapi-106)

ATT&CK ID

T1055 (Show technique in the MITRE ATT&CK™ matrix)

Creates a process in suspended mode (likely for process injection)

details

"win33.exe" called "CreateProcessW" with parameter "%PROGRAMFILES%\(x86)\Internet Explorer\iexplore.exe" - (UID: 00000000-00002684)

source

API Call

relevance

10/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Aapi-129)

ATT&CK ID

T1055 (Show technique in the MITRE ATT&CK™ matrix)

External Systems

Sample detected by CrowdStrike Static Analysis and ML with relatively high confidence

details

CrowdStrike Static Analysis and ML (QuickScan) yielded detection: win/malicious_confidence_100% (W)

source

External System

relevance

10/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Aavtest-8)

Installation/Persistence

Creates a thread in a remote process

details
"win33.exe" creates a thread in process "%PROGRAMFILES%\(x86)\Internet Explorer\iexplore.exe" (Handle: 688)

source
API Call

relevance
8/10

research
Show me all reports matching the same indicator (/search?query=indicatorid%3Aapi-18)

ATT&CK ID
T1055.003 (Show technique in the MITRE ATT&CK™ matrix)

Writes data to a remote process

details
"win33.exe" wrote 00000004 bytes to a remote process "%PROGRAMFILES%\(x86)\Internet Explorer\iexplore.exe" (Handle: 652)
"win33.exe" wrote 00014000 bytes to a remote process "C:\Program Files (x86)\Internet Explorer\iexplore.exe" (Handle: 652)

source
API Call

relevance
6/10

research
Show me all reports matching the same indicator (/search?query=indicatorid%3Aapi-0)

ATT&CK ID
T1055 (Show technique in the MITRE ATT&CK™ matrix)

Pattern Matching

YARA signature match

details
YARA signature "dexter_strings" matched file "sample.bin" as "Identify Dexter POSGrabber" (Author: Brian Wallace @botnet_hunter)

source
YARA Signature

relevance
10/10

research
Show me all reports matching the same indicator (/search?query=indicatorid%3Ayara-0)

Suspicious Indicators 9

Anti-Reverse Engineering

PE file has unusual entropy sections

details
.rsrc with unusual entropies 7.21010740087

source
Static Parser

relevance
3/10

research
Show me all reports matching the same indicator (/search?query=indicatorid%3Astatic-6)

ATT&CK ID
T1027.002 (Show technique in the MITRE ATT&CK™ matrix)

General

PE file has unusual entropy resources

details
"win33.exe" has resource with unusual entropy "RT_ICON:7.21295385209"

source
Static Parser

relevance
5/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Astatic-92)

ATT&CK ID

T1027.002 (Show technique in the MITRE ATT&CK™ matrix)

Installation/Persistence

Found registry location strings which can modify auto-execute functionality

details

Found string "Software\Microsoft\Windows\CurrentVersion\Run" (Indicator: "software\microsoft\windows\currentversion\run"; in File: "win33.exe")
Found string ".DEFAULT\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" (Indicator: "software\microsoft\windows\currentversion\run"; in File: "win33.exe")

source

File/Memory

relevance

5/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Astring-184)

ATT&CK ID

T1547 (Show technique in the MITRE ATT&CK™ matrix)

Network Related

Spawned processes likely due to injection

details

Process "%PROGRAMFILES%\(x86)\Internet Explorer\iexplore.exe" spawned likely due to injection

source

Monitored Target

relevance

3/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Atarget-413)

ATT&CK ID

T1055 (Show technique in the MITRE ATT&CK™ matrix)

Remote Access Related

Contains references to WMI/WMIC

details

Found string "wmiprvse.exe" (Indicator: "wmiprvse.exe"; in File: "win33.exe")

source

File/Memory

relevance

3/10

research

Show me all reports matching the same indicator (/search?query=indicatorid%3Astring-30)

Hiding 3 Suspicious Indicators

All indicators are available only in the private webservice or standalone version

Informative 89

Anti-Detection/Stealthyness

Contains ability to compress/decompress buffers (API string)

Contains ability to create a remote thread (API string)

Contains ability to delay execution by waiting for signal/timeout (API string)

Contains ability to impersonate access tokens (API string)

Contains ability to inject code into another process (API string)

Contains ability to load/free library (API string)

Contains ability to modify process memory (API string)

Contains ability to modify registry key/value (API string)

Contains ability to perform Base64 encoding/decoding

Anti-Reverse Engineering

Contains ability to check debugger is running (API string)

Cryptographic Related

Shows ability to deobfuscate/decode files or information

Shows ability to obfuscate file or information

Environment Awareness

Calls an API typically used to determine if process is running under WOW64

Calls an API typically used to get product type

Calls an API typically used to get system version information

Contains ability to determine if process is running under WOW64 (API string)

Contains ability to read software policies

Contains ability to retrieve information about the current system (API string)

Contains ability to retrieve the OS information (API string)

General

An application crash occurred

Calls an API typically used to create a process
Calls an API typically used to load libraries
Calls an API typically used to retrieve function addresses
Contains ability to create a new process (API string)
Contains ability to create directories (API string)
Contains ability to create/load registry keys (API string)
Contains ability to create/open files (API string)
Contains ability to disable/close registry key (API string)
Contains ability to dynamically determine API calls
Contains ability to execute Windows APIs
Contains ability to find and load resources of specific modules (API string)
Contains ability to retrieve the command-line string for the current process (API string)
Contains ability to retrieve/modify process thread (API string)
Contains ability to retrieve/open a process (API string)
Contains ability to set/get the last-error code for a calling thread (API string)
Contains registry location strings
Creates mutants
Launches a browser
Loads modules at runtime
Loads the RPC (Remote Procedure Call) module DLL
Matched Compiler/Packer signature (DIE)
PE file contains executable sections
PE file contains writable sections
PE file entrypoint instructions
Process launched with changed environment
Reads information about supported languages
Spawns new processes
Spawns new processes that are not known child processes
Uses 32 bit executable PE
Installation/Persistence
Contains ability to load modules (API string)
Opens registry keys
Queries basic information of the specified process
Queries registry keys

Shows ability to use execution guardrails
Touches files
Network Related
Contains ability to communicate with network (API string)
Contains ability to create a HTTP or FTP session (API string)
Contains ability to create a new HTTP request (API string)
Contains ability to download a file from a URL (API string)
Contains reference to Windows internet services (API string)
Found potential IP address in binary/memory
Found potential URL in binary/memory
JA3 SSL client fingerprint
Making HTTPS connections using secure TLS/SSL version
Spyware/Information Retrieval
Contains ability to enumerate process and/or its information (API string)
Contains ability to query registry keys (API string)
Contains ability to read files (API string)
Contains ability to retrieve a module handle (API string)
Contains ability to retrieve address of exported function from a DLL (API string)
Contains ability to retrieve file and directory information (API string)
Contains ability to retrieve the NetBIOS name of the local computer (API string)
Contains ability to retrieve the fully qualified path of module (API string)
Contains ability to retrieve the specified system metric or system configuration setting (API string)
Contains ability to retrieve the time elapsed since the system was started (API string)
Contains ability to retrieve user-agents (API string)
Contains ability to retrieve usernames and/or user information (API string)
Imports GetCommandLine API
System Security
Contains ability to access device drivers
Contains ability to delete files/directories (API string)
Contains ability to delete registry key/value (API string)
Contains ability to hook/unhook windows functions (API string)
Contains ability to modify access token privileges (API string)
Contains ability to terminate a process (API string)
Contains ability to write files (API string)

Queries services related registry keys
Unusual Characteristics
Contains reference to multiple windows system processes
Contains reference to mutex-related activity (API string)
Reads the windows installation language
Reference explorer.exe process
